## Commonwealth of Massachusetts.

INSURANCE DEPARTMENT, BOSTON, March 1, 1887.

To the Honorable the Senate and House of Representatives:

The record of affairs connected with the transaction of Fire and Marine Insurance in Massachusetts during the year 1886 contains few events to distinguish it from the ordinary. The country at large maintains its bad eminence in the melancholy statistics of property destruction by fire, whereby industry is despoiled of its rewards and the community of its thrifty accumulations without possible indemnity; and the perils of the sea have exacted from commerce a full tribute of life and treasure. The aggregate of values lost by casualty fires in the United States in 1886 is estimated at nearly one hundred millions. As regards stability and ability to fulfil their engagements with the public, the condition of the establishments lawfully engaged in these branches of insurance in Massachusetts is found satisfactory to a gratifying degree. And, in general, they have reason to be content with the results of their business of the year.

What comments the Commissioner might otherwise make in his annual report touching the laws applicable to these institutions have been chiefly anticipated in his report submitted to the Legislature earlier in its session, accompanying a draft of an act to codify and amend the insurance statutes of the Commonwealth, prepared under instruction of chapter 83 of the Resolves of 1886.

### THE MACHINERY THAT DOES THE BUSINESS.

Within the year seven companies of other States, namely: the Granite State and People's Fire of New Hampshire; the Michigan Fire and Marine of Detroit; the Firemen's of Baltimore; the Franklin of Columbus, Ohio; the Anglo Nevada of San Francisco, and the Reliance of Philadelphia, — were qualified to do fire insurance in the Commonwealth. One, the Marine of London, England, was admitted to do marine insurance; one, the Paper Mill Mutual of Boston (projected to insure manufacturing property only), organized and qualified under the general laws.

Of the companies authorized at the commencement of 1886, the Orient Mutual of New York went into voluntary liquidation December 31, with perfect integrity to its policyholders; and the Spinners' Mutual of Boston, one of the group of Factory Mutuals, retired from business with the close of the year, "the object of its organization having been accomplished," as its president states, and its risks were assumed by the Boston Manufacturers' Mutual, another of the group, apparently to the satisfaction of all parties affected by the transaction.

The companies authorized Jan. 1, 1887, were 195, classified as follows:—

Massachusetts Mutual Fire Companies,			48
Massachusetts Mutual Marine Companies,		١.	2
Massachusetts Joint Stock Companies,			16
Companies of other of the United States,			102
Companies of Foreign Countries, .			27
Total,			195

A gain of seven companies.

Of the domestic joint stock companies seven transact fire insurance only; four marine only, and five both fire and marine. The Boylston, though organized as a Mutual Fire and Marine company, with a permanent fund under the general law, is classed with the stock companies. It is, in essential character, a stock corporation. The Legislature of last year properly reformed the term "mutual" from its corporate title.

Of the foreign companies ninety-one do fire business exclusively in the State; three marine, and eight both fire and marine.

Since the commencement of the year the New York Equitable, the Fire Association of New York, and the Jersey City have been admitted to transact fire insurance; and the

applications of the Grand Rapids, of Michigan, and the Commonwealth, of New York, have been favorably passed upon.

Massachusetts is recognized abroad by underwriters, and deserves to be, as an attractive field of operations for good companies. A company that cannot prosper with us is the victim of bad management or of peculiar ill-fortune. This statement is supported by the exhibit elsewhere given of the fire insurance business of the State for 1886.

The dates of admission of the new companies are as follows:—

#### Admitted.

J.,	July 2, " Aug. 4, " 20, " Nov. 8, "

Amount and Character of the Business of 1886.

The whole business of the Fire and Marine companies, foreign and domestic, for and at the close of 1886, as compared with 1885, shows an increase of \$14,741,132 in assets and of \$5,806,171 in liabilities; of \$800,071,212 in volume of fire and \$31,049,950 of marine insurance in force; an income increase of \$3,988,396 against an increase of \$2,015,687 in expenditures; and an increase of \$361,870 in cash dividends and \$8,576,300 in surplus. The increase of cash capital is \$3.878,000.

The companies of other States, and the United States branches of foreign companies, each suffered a less fire loss upon a larger aggregate of risks written and outstanding, than in 1885. The Massachusetts Stock Fire companies show an increase in amount of insurance written and in force, and a somewhat less proportionate increase in losses.

With more business their expenses fall below 1885, and their cash dividends are \$86,000 more on the same capital.

Our Mutual Fire companies increased the amount of their insurance by the sum of \$25,115,575. Their losses were \$867,480, an excess of \$302,546 over 1885. Their cash income was \$3,464,469, their cash premiums \$3,068,515, and they returned in dividends to their policy-holders after payment of their losses and expenses the sum of \$1,844,928, or sixty per cent. of their cash premiums, and added \$96,067 to their cash surplus.

The exhibit of marine business by the domestic and other State companies is less favorable, while, in that branch, the companies of foreign countries have been singularly fortunate, if their statements of their American business are true. These latter companies, as their statements show, wrote \$78,128,774 more marine insurance in 1886 than in 1885, received \$1,633,533 in premiums on that business, and suffered losses of only \$661,312, as against \$1,073,684 in 1885.

Our two domestic Mutual Marine companies wrote \$3,564,684 more insurance in 1886 than in the previous year. Their income was \$386,569, their cash premiums \$353,504, and their losses \$345,653, as against \$322,999 in 1885. Their surplus is \$986,071, a loss of \$93,914.

The aggregate cash premiums for fire insurance of all the companies was \$84,353,069 and their fire losses \$46,181,525.

## MASSACHUSETTS BUSINESS OF THE YEAR.

Of the total of fire insurance in Massachusetts written in 1886, \$694,473,662, the forty-eight domestic Mutuals wrote \$174,633,012, the twelve domestic Stock companies \$73,-655,473, ninety-nine other State companies \$275,529,471, and twenty-three companies of foreign countries \$170,655,-706.

Of marine insurance in Massachusetts our two Mutuals wrote \$20,332,627, nine domestic Stock companies \$67,058-897, eleven other State companies \$103,888,743, five companies of foreign countries \$42,282,739; total, \$233,563,006.

The premiums and losses on Massachusetts business were:—

Fire.

		Premiums.	Losses.	Per cent. of
Mass. Mutuals, .		\$1,951,904	\$691,633	35.43
Mass. Joint Stock,		798,355	397,191	49.75
Other States, .		3,146,160	1,374,526	43.71
Foreign countries,		1,942,006	905,944	46.65
Totals,		\$7,838,425	\$3,369,294	42.98

Marine.

		Premiums.	Losses.	Per cent. of
Mass. Mutuals, .	٠,	\$335,839	\$292,190	87.02
Mass. Joint Stock,		1,390,700	1,112,802	80.01
Other States, .		771,562	699,383	90.64
Foreign countries,		250,965	173,435	69.14
Totals,		\$2,749,066	\$2,277,810	82.87

As near as is determinable from their annual statements, the Mutuals returned to their Massachusetts policy-holders in dividends of surplus or profit, \$1,049,048.

From these exhibits it would appear that the people of Massachusetts paid to these companies for fire insurance, in 1886, \$6,690,455; of this sum, \$3,337,592 went to pay losses by fire to the insured property, and the rest, a little more than a half of the whole, went for expenses and profits to the companies. More than half the cost of fire insurance to the public is made up of the expenses of the business and profits to the capital invested in it.

The amount of insurance effected in unauthorized foreign companies under the provisions of chapter 300 of the Acts of 1885 was \$5,211,885, and the premiums thereon \$86,683.53.

The comparative and statistical tables which follow will furnish the particulars of these generalizations, and much other information.

## Massachusetts Fires in 1886.

[See Tables XIV., XVII.]

Returns by the municipal and town authorities of fires within the Commonwealth during the year are not marked by singular features of significance. The number of fires (1,920) is somewhat above the average (1,861). The damage by fire (\$4,579,530) is also in excess of the average for nine years past (\$4,334,158). The amount of insurance paid (\$3,446,139) would indicate a positive loss to the property owners, not indemnified by insurance, of \$1,133,391. These are estimates, but probably near approximations.

Of the principal causes of fires we have incendiarism charged with 289, last year 278; defects in chimneys 168, last year 158; use of inflammable oils 131, last year 124; carelessness with matches 116, last year 109; overheated stoves 63, last year 64; spontaneous combustion 61, last year 60. A close parallel between the years is observed in the number of fires attributed to these causes, - an illustration of the law of averages. Four hundred and eighty-six fires are reported as of unknown origin. These annual statistics, gathered by the local authorities, as remarked in former reports, possess some value. It seems pity they are not made of higher authority and larger usefulness, as they might be by the help in their preparation of some efficient plan for an intelligent and careful investigation of the origin and other related facts of all casualty fires occurring in the State. The selectmen of Beverly, Concord, Holbrook, Montague, Pittsfield, Spencer and Winthrop make no returns, though much importuned to do so, and the published statistics do not include those towns.

It seems the law should enforce the performance of their duty by the local authorities, by suitable penalties for their neglect.

The creation of the office of Fire Marshal for Boston by the last Legislature was a measure of excellent design. I trust the office may be clothed with all needed powers for its administration. An extension of the system until it embraces the entire Commonwealth would be justified by public policy.

#### TRUE ANNUAL STATEMENTS.

If the annual statements of the companies for 1886 are honestly and intelligently made up, as I presume them to be, they are what they purport and the law requires, - accurate and complete exhibits of the business of the several companies for the year and their condition at the close of the calendar year. This could not be affirmed with confidence of former annual statements by some of the companies. The slovenly habit of making up the statements from estimates and approximations, and with omissions of transactions not reported on the 31st of December, when with proper effort and reasonable time the precise facts are ascertainable, is not only bad business form, but causes confusion and tends to positive mischiefs. What is wanted in the annual statement is not merely the knowledge the officers may have or what may appear from the books and papers in the home office on the 31st day of December. but what are the actual facts as to the year's transactions of the corporation and its condition on that date. And the officers making oath to the statement are obligated to verify the facts they certify to, by resort to all sources of information and knowledge. As was well stated by a former Superintendent of the New York department: "The report is not issued for the purpose of conveying news merely. but to furnish full, carefully compiled and reliable data: and there seems to be more need for care, correctness and deliberation than for haste in its preparation." give such a character to the annual department report, and to enable it to perform such an office, as well as in obedience to the law, I have insisted that the annual statement shall be made as nearly a perfect record as possible of the transactions it is supposed to recite. I acknowledge with pleasure the graceful acquiescence of all, and the cordially expressed approbation of most, of the companies.

#### RECEIVERSHIPS.

The receivership of the Conway Mutual Fire is formally closed.

The unclaimed funds in the hands of the receiver of the Neptune Fire and Marine are reduced to \$614.04.

The receiver of the New England Mutual Marine reports a balance of \$612:15 of dividends unpaid from default of claimants.

There seems no reason why the accounts of these receiverships should not be finally settled in form of law the present year.

The receiver of the City Mutual Fire still holds \$1,142.28 due under the decree of court to seventeen policy-holders or their legal representatives. This case illustrates the evil and the injustice of the indefinite accumulation of surplus by Mutual companies. The City Mutual Fire closed its business, after a thirty years' career, in 1878, solvent and with a surplus. The court in 1884 ordered a distribution of the surplus to the persons who were policy-holders of the company within two years of its dissolution, few if any of whom had contributed a dollar to it. And now, after so brief a lapse of time, the receiver finds it difficult or impossible, as to a part of the fund, to distribute it to the persons on whom the law seeks to bestow it. No harm results by the failure of distribution, the legal distributees suffer no injustice, but to the original owners from whom the fund was wrongfully taken an injury is done, now impossible to repair.

#### EXAMINATIONS.

Of the foreign fire and marine companies the Mechanics of Philadelphia was visited and examined by the Commissioner in May last, and the Michigan Fire and Marine of Detroit, the Mechanics' of Milwaukee and the Citizens' of Cincinnati, by Deputy Commissioner Smith, in September last. These examinations, verifying the annual statements and the general sound condition of these companies, were in all respects and in every case satisfactory, and attended with inconsiderable expense. The other foreign companies admitted during the year have not been visited and examined

by the department. Their reputable character and sound financial condition were so well avouched by evidence, including certificates of recent examination by the insurance departments of their respective States, that a visitation and examination, involving much expense, precedent to their admission, was not deemed expedient.

Five examinations (triennial) of domestic fire companies were made, and their annual statements verified, to wit: The Boylston, the Dorchester Mutual, the Washington Fire and Marine, the Cambridge Mutual and the Berkshire Mutual. Under the provision of the statute which requires each domestic insurance company to be examined as often as once in every three years a large number of examinations are due to be made the present year. The department will endeavor to fulfil the law.

THE PEOPLE ARE OVERCHARGED FOR FIRE INSURANCE.

Two years ago, in the annual report of the department, I wrote:—

The too great cost of insurance challenges the attention of a frugal public. We pay too much for insurance protection. . . . Plainly, it should not, as for a quarter of a century it has, cost the people of this country a hundred million dollars and more to protect themselves by insurance against sixty million dollars loss of property by fire. The conviction of fault is in the mere statement of fact, and the fault must be capable of reformation. . . The simple proposition that the cost of insurance can and must be reduced is referred to the astute men in charge of our insurance institutions for their consideration, while the public patience reasonably waits to see that done which can be done better by private enterprise than by compulsion of law.

These observations have lost none of their force. Two elements make up the cost of insurance,—(1) the payment of losses, and (2) the expenses of carrying on the business, which, if conducted on the stock plan, includes profits to the capital engaged in it. These may be termed the loss cost and the expense cost. As is elsewhere made to appear, the expense cost was the larger part of the cost of fire insurance in 1886 to the people of Massachusetts. The same is true of the year before.

The popular discontent with the expensiveness of fire insurance protection is manifesting itself in efforts to cheapen it by avoidance of needless expense in the transaction of the business, and by expedients to prevent loss. A great influence is exerted by the Mutuals, which save the expense of capital, and escape the burdensome charges for procuring business in the form of commissions to agents and brokers. The tendency is towards combinations by property owners for mutual insurance, or the formation of confederated companies with capitals limited to moderate dividends, and participation in profits by the assured, and conducted at minimum cost of management. This movement of the public is a protest against an unjust burden, and will prevail finally to compel the companies to reform the machinery of their business and reduce the cost of insurance, or to retire from the field in favor of better methods the enterprise of the people will inaugurate.

Perhaps the most conspicuous item of needless cost in fire insurance is the commission charge. The companies fix their rates to include this charge, which is fifteen per cent. or more, usually more, of the whole premium, and the property owner has to pay it whether a broker is employed in the transaction or not. There may be individuals with large lines of insurance to place to whom the services of a broker may be of value. Such persons should be left to employ and pay for such services. But to the great majority of people who insure, the broker is of no use, and to saddle them with the burden of his expense is a wholly inexcusable injustice. Compulsory pilotage laws compel the employment and payment of pilots by navigators in certain waters, whether the service is needed in the particular venture or not. This, however, is justified only because the skilled pilot is indispensable to the safety of general navigation, and therefore the common body of marine commerce may fairly be put under contribution for the maintenance of the craft. It will hardly be argued by any one of intelligence that the broker is of so general value to the transaction of insurance, that his support may properly be charged upon the insured public as a whole.

Fire underwriters in New York and in Boston have associated in efforts to reduce the usual commission rates which have grown greatly of recent years under the stimulus of business rivalries; with what measure of success does not yet distinctly appear. But the symptom is favorable, as it indicates a lively sense of the public demand for some action by the companies in the matter. The underwriters will consult their interest as well as the public's if they deal radically with the fault and reform it altogether. They can accomplish it, notwithstanding the bad methods into which the business has fallen, if they act in loyal concert and with resolution.

The loss cost of insurance, if not within the control of the underwriter as the expense cost is, is largely within his influence. He may affect it by the exercise of care and judgment in the selection of risks and the just apportionment of premium to hazard. Still more effectually he may affect it by intelligent co-operation with the assured to avoid loss by the use of means of prevention. It is cheaper to prevent loss than to pay for it. And it is vastly better to save property which is a part of the common wealth, than to compensate the individual owner for the loss he suffers by its destruction. From a narrow and selfish standpoint the underwriter may argue that the abatement of fire perils is no concern of his, since the greater the danger the larger will be the demand for the insurance he supplies, and why should he help to injure the market he trades in? But that spirit is not adapted to our social state. That business is not only the most honorable, but is likely to prosper the best, which consults the common welfare as well as the profits of those who carry it on. The system of insurance has wrought great good in the relief it extends to the unfortunate, but it is capable of still larger usefulness in the prevention of misfortune. The remarkable success of the Mill Mutuals in the reduction of insurance cost to their patrons and in the conservation of property furnishes an inspiring example.

ABILITY OF FIRE INSURANCE ON THE MUTUAL PLAN.

A recent publication by a distinguished underwriter, the president of a prominent stock company, discussing the

relative merits of the stock and mutual plans of insurance, says:—

"Behind the mutuality of the purely mutual company there is nothing in the way of security except the obligations of the policy-holders themselves. Behind the mutuality of the stock companies, that is, the amount of premiums paid each year, is the amount of stock paid in and invested as a guarantee fund for the payment of losses which exceed the premiums. While, as a usual thing, the success of a company rests mainly on the amount of its business in premiums and the small percentage of its losses and expenses, yet the capital behind this is really what makes the difference between a stock and mutual company, and that to which the property owner should look in looking for insurance. In conflagrations such as those of Portland, Me., in 1866, Chicago in 1871, and Boston in 1872, while there were many stock companies totally used up, yet those who held policies in mutual companies, as many did in Boston and Portland, upon the property consumed, fared very much worse than the average of those who held policies in stock companies."

This statement, so wide and reckless of the fact, must be challenged, in justice to the system it unfairly assails, and in defence of the truth of history it falsifies.

Twenty-two—all but six, and those small ones, with a single exception—of the Massachusetts Stock Fire companies were bankrupted by the Boston fire of 1872. With two exceptions, these companies each had an unimpaired capital and a liberal surplus when the great conflagration came. Yet they were able to pay less than fifty per cent. of their insurance losses.

Four Mutuals were forced into liquidation by the Boston fire. Three paid their losses and all debts in full. The other paid 85 per cent. of its losses and debts.

Several other Mutuals suffered losses that greatly exceeded their cash funds, and would have bankrupted stock companies of equal size; but they each met their obligations from drafts upon their contingent liability funds, continued in business, and are strong and excellent institutions to-day. Notable of these are the Quincy Mutual, and the Merchants' and Farmers' of Worcester.

A comparison of the four Mutuals, which went into liquidation, with the four largest and strongest of the bankrupt Stock companies, will make the demonstration clear.

Mutuals.

		From Cash Assets.	From Assessments.	Paid Losses.
Mechanics, .		\$675,000-	\$870,000	In full.
Massachusetts, .		536,000+	827,000	
Union,		334,163+	623,152	85 per cent
Boot and Shoe,		19,319+	58,965	In full.

Stock Companies.

		Capital.	Surplus.	Paid Losses.
Manufacturers',		\$400,000+	\$611,261	$77\frac{65}{100}$ per cent
Firemen's Fire, .		300,000+	599,522	41 <sup>2</sup> / <sub>10</sub> " "
Washington, .		300,000+	477,990	831 " "
Boylston,		300,000+	432,124	47 4 " "

The Stock companies, with large invested capitals intact, and still larger cash reserve accumulations to reinforce their ordinary premium funds, were rendered hopelessly bankrupt; while three of the Mutuals found their contingent funds sufficient to discharge all their liabilities, and the other Mutual paid to its creditors a larger per cent. of their claims than any of the Stock companies were able to pay their creditors. The capitals of three large Stock companies contributed one million dollars to the payment of their losses. The contingent liability funds of three large Mutuals contributed over two million three hundred thousand dollars to the payment of their losses. The superiority of specific capitals over associated mutual liability, as a basis of insurance, is not apparent from these figures.

Mutual companies and Stock companies each have funds, derived from premiums paid by their policy-holders, for the performance of their contracts to pay losses. Behind this fund, for the further protection of the assured, stands, in Stock companies, a specific cash capital, and, in Mutual companies, a mutual obligation of the members for proportionate contributions, liable for losses when the premium fund shall prove insufficient. The losers by the Boston fire found the mutual obligation of the Mutuals more efficient than the cash capital of the Stock companies for their protection.

Since the Boston fire—a period of fourteen years, which covers all the ordinary vicissitudes that the business of insurance is exposed to—each and every one of the well-established Mutual Fire companies in general business has found its normal cash premium income equal to its losses and expenses, with a margin, and generally a liberal one, to spare. No one of them has been compelled to resort to its contingent funds to meet its obligations. And to-day, as any time in that interval, their proportionate ability to discharge the responsibilities of an unusual crisis is fully equal to that of sound Stock companies.

Whatever individual disasters — and they are numerous and disgraceful — have attended the practical establishment of the system of mutual fire insurance in Massachusetts, they are clearly referable to causes that do not impeach the ability or merits of the system, under capable and upright administration, defended by well-considered laws.

An instruction of the Boston fire, illustrating characteristics of the two systems, is worthy of remembrance. The Mutuals were obliged to collect of their members large aggregate sums to meet their losses. But, as the burden was distributed among so numerous a body of constituents, it was lightly borne and not grievous to any one. Of the thousands of Mutual policy-holders who were assessed to pay the extraordinary losses by the Boston fire, few, if any, felt it more than a reasonable and cheerful contribution for the relief of the sufferers. Not so with the Stock companies. Their capitals and all their profits were swept away. The loss fell heavily, and in some cases painfully, upon the few stockholders who lost their entire investment.

A recognition of the particular merits of the mutual plan does not discredit the merits of the stock plan. Whatever may be the ultimate development of insurance methods, it is certain that the companies—the Stock and the Mutual—are each now worthily serving our social wants. The public has present use for both, and is only concerned in the improvement of the excellences of each, and the reformation of any defects that may be found in either.

RESERVES AND SURPLUS IN MUTUAL FIRE INSURANCE.

Every Mutual Fire company whose losses and expenses are less than its cash premiums will have a cash surplus. Such a surplus, reasonably sufficient to provide for losses beyond usual expectation, each company is entitled to hold, and should secure the accumulation of by the advance collection of adequate cash premiums.

But such a surplus is produced by the policy-holders,—they own it, subject to its liability to be used for the payment of losses they are mutually bound for; and each member when he retires from the association is entitled to withdraw his unexpended share of it.

Such has been the law of mutual fire insurance from the introduction of the system into Massachusetts. It was written in the charter of the Massachusetts Mutual Fire in 1798, the earliest incorporation. Under it, that original company pursued a prosperous career for seventy-four years, never once resorting to its contingent funds until the Boston fire, after which it voluntarily ceased business, paying every dollar of its indebtedness. Such was the law enacted in the general insurance statute of 1856. And such is the law to-day, applicable to all our purely Mutual companies, with perhaps, one exception.

In the administration of the mutual plan the cash premium fund is calculated to provide for all ordinary exigencies of losses and expenses. How completely that expectation is justified by actual experience, the facts cited here and in former department reports, and found in the business statistics of all our reputable companies, demonstrate. For further assurance, and in provident care for possible contingencies, the reserve mutual liability of the members to contribute for the payment of losses not provided for by the premium fund accumulation fills in the mutual system a place equivalent to that of specific capital in the stock system. That it is competent to perform that function, I trust no further argument or facts are needed to convince.

Now, if the safe and efficient administration of the mutual system demands, in addition, the protection of a cash capital, or its equivalent of a permanent cash reserve, may we not fairly question of what possible advantage is the mutual system? Why not rely altogther upon the stock system, with its fixed capitals for our insurance, and cast aside the mutual as impracticable. Or, in simple justice between man and corporation, shall not a virtuous law command that if a Mutual company wants such a capital, it shall get it honestly, pay justly for its use to those who supply it, and not filch it from the public?

This discussion is invited by the appearance before the legislative joint committee of representatives of Mutual companies who argued in favor of legislation to permit the companies to retain from their policy-holders, and hold as permanent corporation funds, an amount equal to three per cent. of their insurance in force. As the aggregate of insurance by the companies is more than five hundred millions of dollars, the proposition is, in effect, to levy upon the public a tax of more than fifteen million dollars for the benefit of the corporations! The injustice of the proposal is not qualified by the suggestion that the tribute exacted from one part of the public may accrue to the profit of another part of the public, - that if one generation of policyholders suffer, another may rejoice. As well might the thief who pilfers treasure from his neighbor's pocket and puts it in his own, justify by that plea and ask the law to sanction it. Besides, large surplus funds induce unthrifty habits, lavish salaries and wasteful expenditure, quite liable to offset the benefits of its income and thus to profit the officers and agents of the corporation rather than its customers of the public.

From the facts and reasons of the matter, these conclusions seem inevitable:—

- (1.) A Mutual company does not need an independent cash reserve to assure its ability to insure. Its proper cash premium fund and contingent mutual liability are adequate for that purpose. Or, if greater assurance is desired by its members, they should provide it in the only just and honest mode possible to the mutual system, by enlarging their mutual liability or by fair purchase of the use of a specific capital to reinforce the mutual insurance.
- (2.) Such an accumulation of corporate funds is a danger to the integrity of the institution, since it offers the temptation with easy opportunity for a few persons in managerial control of the corporation to contrive its dissolution and the division of its property as spoils to themselves.
- (3.) To authorize these companies to hoard up corporate funds, by laying tribute upon their policy-holders beyond the cost of insurance, would be to legalize a wanton wrong to the public.

These matters have been set forth with various illustrations in former reports; but in view of pending legislative action upon the revision of the insurance statutes, I recall them here, and once more commend them to the consideration of the Legislature.

### DEPARTMENT FINANCES.

The total cash income of the department for 1886 was \$34,768.46; total disbursements, \$19,237.77; balance accrued to the treasury, \$15,530.69. A more particular statement is elsewhere made. See Table XVIII.

The Legislature of last year restored the salaries of the first and third clerks as established before the reduction in 1879, an increase of \$200 each. This was justified, if not by the unreasonableness of the reduction, certainly by the new duties and larger responsibilities since charged upon those officers.

Also, the annual appropriation for clerical assistance employed in the valuation of life policies was enlarged to \$8,000, an increase of \$1,000. This increase of compensation is proportionately much less than the increase of the amount of work done.

#### xxii REPORT OF THE INSURANCE COMM'R.

The contingent expenses of the year were \$1,589.25, a sum considerably less than the annual average.

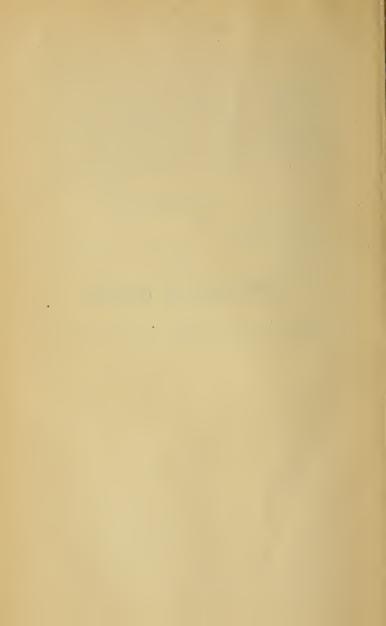

The disbursements do not include the cost of publication of the annual report, nor the expense to the Commonwealth of the premises occupied by the department business. With these items included in the cost of maintenance, the support of the department is substantially provided for by the fees collected of the companies and their agents; and the surplus revenue accrues principally, or altogether, from fees for licenses to brokers.

Respectfully submitted,

JOHN K. TARBOX,

Insurance Commissioner.

<sup>\*</sup> At a meeting of this company held for that purpose April 9, 1878, it was voted that the company accept chapter 198 of the Acts of 1877 (now sect. 96, chap. 119, P. S.) for the accumulation of a permanent fund, and authorized the directors to take such action as they may deem expedient in the matter. In accordance with which, transfers from profit and loss account to permanent fund account have been made from time to time, and said permanent fund now amounts to \$90,032.63.

SUMMARY OF ASSETS, DEC	c. 31, 1886.			
Cash value of unencumbered real estate, .				
Loans on mortgage of real estate (first liens*)				
Interest accrued thereon,	358	42		
Stocks and bonds, as per schedule,	7,843,486	00		
Loans on collateral security, as per schedule,	11,180	00		
Cash in the office of the company,	4,117			
deposited in bank,	932,399	49		
Interest due and accrued,	986			
Premiums in course of collection (gross), .				
Gross assets,			\$9,622,265	68
Deduct special deposits in other States, .			114,580	00
Balance,			\$9,507,685	68
Liabilities.				
	\$46,023	81		
Losses adjusted, unpaid,	188,752			
disputed or resisted,	13,743			
Unearned premiums on outstanding risks,	1.792 166	39		
Reclaimable on perpetual fire policies, .		33		
Due and accrued for rent, salaries, etc., .	500	00		
Commissions and brokerage,	88,832	20		
Return premiums,	27,802	64		
Gross liabilities, except capital,	\$2,175,057	20		
Gross liabilities, except capital, Deduct liability on special deposits,	46,356	29		
			\$2,128,700	91
Surplus as regards policy-holders,			\$7,378,984	77
Paid-up capital,		•	4,000,000	00
raid-up capital,		•	4,000,000	
Surplus over capital,		•	\$3,378,984	77
Income.				
Cash received for fire premiums,	\$2,692,745	14		
Deduct re-insurance and return premiums,				
Net cash received for fire premiums,			\$2,454,905	36
Cash received for inland premiums,	\$200,449	69		
Deduct re-insurance and return premiums,	37,720	82		
Net cash received for inland premiums, .			162,728	87
Interest received on mortgages,			2,344	
Interest and dividends received from all other	er sources,		405,511	16
Income from rents,			8,671	
Income from rents,	. \$1,693	85		
Gross cash income,			\$3,034,161	70
* Value of lands mortgaged,	\$57	,000	00	
Value of buildings thereon,	58	,000	00	

Amount of insurance held as collateral, . 34,000 00

# EXPENDITURES.

Cash paid for fire losses,		. 4	\$1,337,415 53
for inland losses,			91,640 04
Cash dividends paid,			720,000 00
Cash paid for commissions and brokerag			400,107 05
for salaries of officers and emp	oloyees, .		162,122 23
for State and local taxes, .			49,042 58
for incidentals,			189,948 22
Deposits ret'd on perpetual fire risks, .	\$54	00	
Gross cash expenditures,			\$2,950,275 65
RISKS AND PRE	MIUMS.		Premiums.
Fire risks outstanding Dec. 31, 1885, .	\$288,605,997	00	\$3,405,226 16
written during 1886,	228,954,379		
written during 1000,			
Total,			\$6,116,651 98
Deduct risks expired and terminated,	219,037,475	00	2,599,877 94
In force at end of year,	\$298,522,901	00	\$3,516,774 04
Deduct amount re-insured,	4,420,732	00	55,090 23
Net amount in force,	\$294,102,169	00	\$3,461,683 81
Perpetual risks in force (included abo	ove), \$751,300	00	\$18,143 50
Inland risks outstanding Dec. 31, 1885,	. \$604,788	00	\$12,235 98
written during 1886,	. 61,239,626		209,602 06
withou during 1000,			
Total,	\$61,844,414	00	\$221,838 04
Deduct risks expired and terminated,	58,676,178	00	200,523 70
In force at end of year,	\$3,168,236	00	\$21,314 34
Miscellane	ous.		
Premiums received from organization of	company, .	\$1	01,115,792 00
Losses paid from organization of compa			60,180,399 00
Cash dividends declared from organizati		у,	15,713,365 00
Dividends declared during the year (18	per cent.), .		720,000 00
Fire losses incurred during the year, .			1,306,791 00
Inland losses incurred during the year,			114,485 00
Company's stock owned by directors,			269,800 00

# ALBANY INSURANCE COMPANY, ALBANY, N.Y.

[Incorporated March 8, 1811. Commenced business March 16, 1811.]
PAID-UF CAPITAL, \$200,000.

J. HOWARD KING, President.

JOHN E. McElroy, Secretary.

<sup>\*</sup> The company holds, also, instalment premium notes to the amount of \$511,346.01 which do not enter into nor form any part of the assets of the company, as no portion of them is earned. Whatever value is attached to them would necessarily be counterbalanced by the addition of an exactly equal amount to the re-insurance liability, the entire sum consisting of "unearned premiums."

<sup>\*</sup> The company holds, also, instalment premium notes to the amount of \$228,673.20 which do not enter into nor form any part of the assets of the company, as no portion of them is earned. Whatever value might be attached to them would necessarily be counterbalanced by the addition of an exactly equal amount to the reinsurance liability, the entire sum consisting of "unearned premiums."

# TAX RETURN

OF

# AGENTS OF INSURANCE COMPANIES

OF OTHER STATES AND COUNTRIES

(EXCEPTING LIFE AND ACCIDENT COMPANIES),

FOR THE YEAR ENDING OCT. 31, 1886, AS RETURNED TO AND COM-PILED BY THE TAX COMMISSIONER. EVERY AGENT of any insurance company not incorporated in the Commonwealth is required by law to procure from the the name of the Agent, and also the name of the company for which he is authorized to act. It expires, and must be renewed, on Insurance Commissioner a CERTIFICATE OF AUTHORITY for each company for which he proposes to act. The certificate specifies the first day of April in each year.

To guard against the impositions of fraudulent companies and dishonest agents, the Commissioner deems it his duty to advise that parties solicited to insure in any company not chartered in this State, should decline to deal with any person not holding the Commissioner's Certificate of Authority, or to insure in any company not named in the Certificate.

Gross assets,
Gross assets,
State and local taxes, \$437 71
Income.
Premiums collected during the year, . \$126,179 38
Gross cash income,
Expenditures.
Cash paid for marine losses, \$118,063 55
for salaries of officers and employees, 2,400 00
for State and local taxes, 1,118 49
for rent and incidentals,
Gross cash expenditures,
RISKS AND PREMIUMS.
Premiums.
Marine risks written during 1886, \$1,776,737 00 \$136,331 87
expired and terminated, 1,776,737 00 136,331 87
Miscellaneous.
Marine losses incurred during the year, \$118,064 00

<sup>\*</sup> The stock is subscribed annually, in November, in shares of \$1,000 each, for which a stock-note is given of \$200 per share, upon which all assessments are made. Each subscriber is required to insure vessel-property to at least seven-eighths of the amount of stock taken by him. No vessels are insured except Gloucester fishing-vessels. No one risk exceeds \$10,000. All risks terminate on the fifteenth day of November of each year, and each year's business is settled at the close of the year. Premiums commence in November at 9 per cent., and decrease as the season advances to 4 per cent., which is the lowest premium.

### INSURANCE LAWS OF 1886.

#### [CHAP. 58.]

An Act to change the Name of the Boylston Mutual Insurance Company.

Be it enacted, etc., as follows:

SECT. 1. The Boylston Mutual Insurance Company may take and hereafter be known by the name of the Boylston Insurance Company.

Sect. 2. This act shall take effect upon its passage. [Approved March 11, 1886.

#### [CHAP. 102.]

An Act authorizing the Boston Marine Insurance Company to extend its Business.

Be it enacted, etc., as follows:

- SECT. 1. The Boston Marine Insurance Company may engage in the business of insuring property on land against loss or damage by fire and lightning in addition to its present authorized business; but said company shall not commence business under the permission of this section until its stockholders at a duly notified meeting shall vote to accept the provisions of this act, nor until certificates signed and sworn to by the secretary of the corporation setting out a copy of such vote shall be filed with the secretary and insurance commissioner of the Commonwealth.
- Sect. 2. Said corporation may invest a portion of its assets not exceeding twenty-five per cent. thereof and not exceeding five hundred thousand dollars in real estate adapted for the convenient and profitable transaction of its business.

Sect. 3. This act shall take effect upon its passage. [Approved March 24, 1886.

#### [CHAP. 187.]

An Act establishing the Salaries of Certain Clerks and providing for Additional Clerical Assistance in the Department of the Insurance Commissioner.

Be it enacted, etc., as follows:

Sect. 1. The insurance commissioner may employ in the discharge of the duties of his department, a first clerk at an annual salary of two thousand dollars, a second clerk at an annual salary of fifteen hundred dollars, and a third clerk at an annual salary of twelve hundred dollars, and such additional clerks and other assistants as may be necessary for the despatch of public business at an expense not exceeding eight thousand dollars a year.

SECT. 2. Section four of chapter one hundred and nineteen of the Public Statutes is hereby repealed.

Sect. 3. This act shall take effect upon its passage. [Approved May 6, 1886.

#### [CHAP. 222.]

An Act extending the Powers of Certain Insurance Companies.

Be it enacted, etc., as follows:

SECT. 1. Section eighty-eight of chapter one hundred and nineteen of the Public Statutes is hereby amended by adding at the end of said section the words:—and Canada,—so that the same shall read as follows:—Any such company may issue policies on any property included in the terms of its charter or certificate of organization, situated in the New England states, New York, New Jersey and Pennsylvania. Those insuring only manufacturing property, and those having a guaranty capital may insure property located in any part of the United States and Canada.

Sect. 2. This act shall take effect upon its passage. [Approved May 18, 1886.

## [CHAP. 233.]

An Act relating to Sureties on Probate Bonds.

Be it enacted, etc., as follows:

Any money paid with the approval of the judge of probate in any county to any corporation duly organized and authorized to act in this Commonwealth in guaranteeing the fidelity of persons and in acting as surety on bonds, or to any person for acting as surety on any official bond given to such probate judge, may be allowed in his discretion as a charge against the estate in which such bond is required. [Approved May 21, 1886.

#### [CHAP. 83.]

Resolves providing for a Revision and Codification of the Existing Laws relative to Insurance.

Resolved, That the insurance commissioner be authorized and requested to prepare a revision and codification of the existing laws relative to insurance, and report the same to the next general court.

Resolved, That such commissioner be authorized to employ the assistance necessary to complete the work. [Approved June 30, 1886.
